Elastic Beanstalk AseFinal ASELAB10 Sample2 Sample3 SampleAmazon Create New Application

### Create a new environment

Choose a platform for your new environment. You can start with a sample app, use an existing app or upload your own code. Then, you can configure more options or deploy your environment. By creating an environment, you allow AWS Elastic Beanstalk to administer AWS resources and necessary permissions on your behalf. [Learn more.](#)

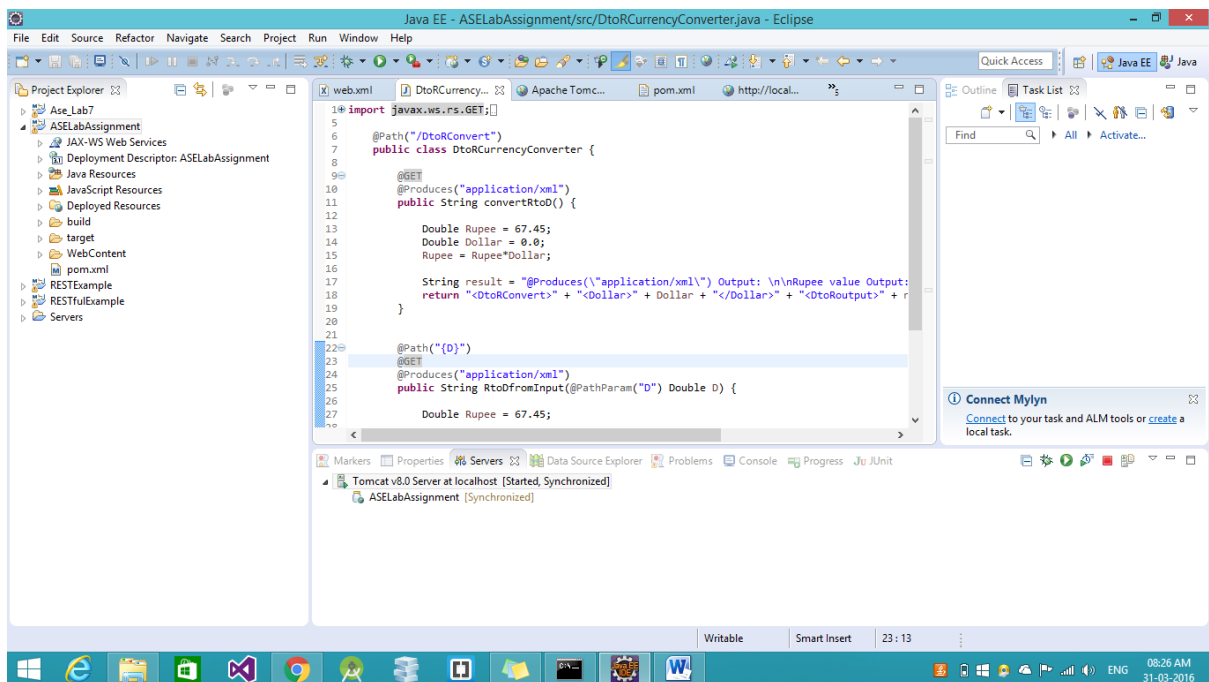

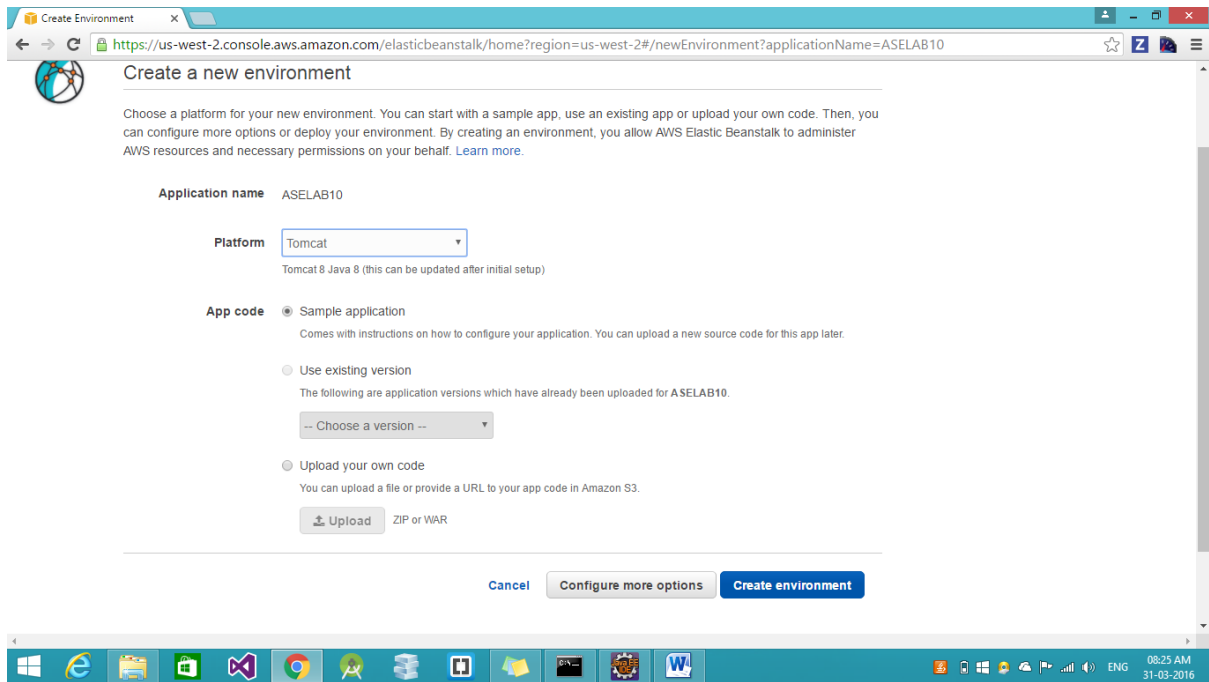

Application name ASELAB10

Platform -- Choose a platform --

App code

- ☒ Sample application  
Comes with instructions on how to configure your application. You can upload a new source code for this app later.
- ☐ Use existing version  
The following are application versions which have already been uploaded for ASELAB10.  
-- Choose a version --
- ☐ Upload your own code  
You can upload a file or provide a URL to your app code in Amazon S3.  
[Upload](#) ZIP or WAR

ASELAB10 ▶ aselab10 (Environment ID: e-cctnjpzk5p, URL: ) Actions

**Creating aselab10**

This will take a few minutes.

```
8:29am Successfully launched environment: aselab10
8:29am Environment health has transitioned from Pending to Ok.
8:28am Added instance [i-0800edf363916aa0] to your environment.
8:28am Waiting for EC2 instances to launch. This may take a few minutes.
8:26am Environment health has transitioned to Pending. There are no instances.
8:26am Created security group named:
awseb-e-cctnjpzk5p-slack-AWSEBSecurityGroup-1TQHZIPRUVXGL
8:26am Created EIP: 52.32.1.95
8:26am Using elasticbeanstalk-us-west-2-095788261600 as Amazon S3 storage bucket for environment data.
8:26am createEnvironment is starting.
```
