

ASE Assignment-9

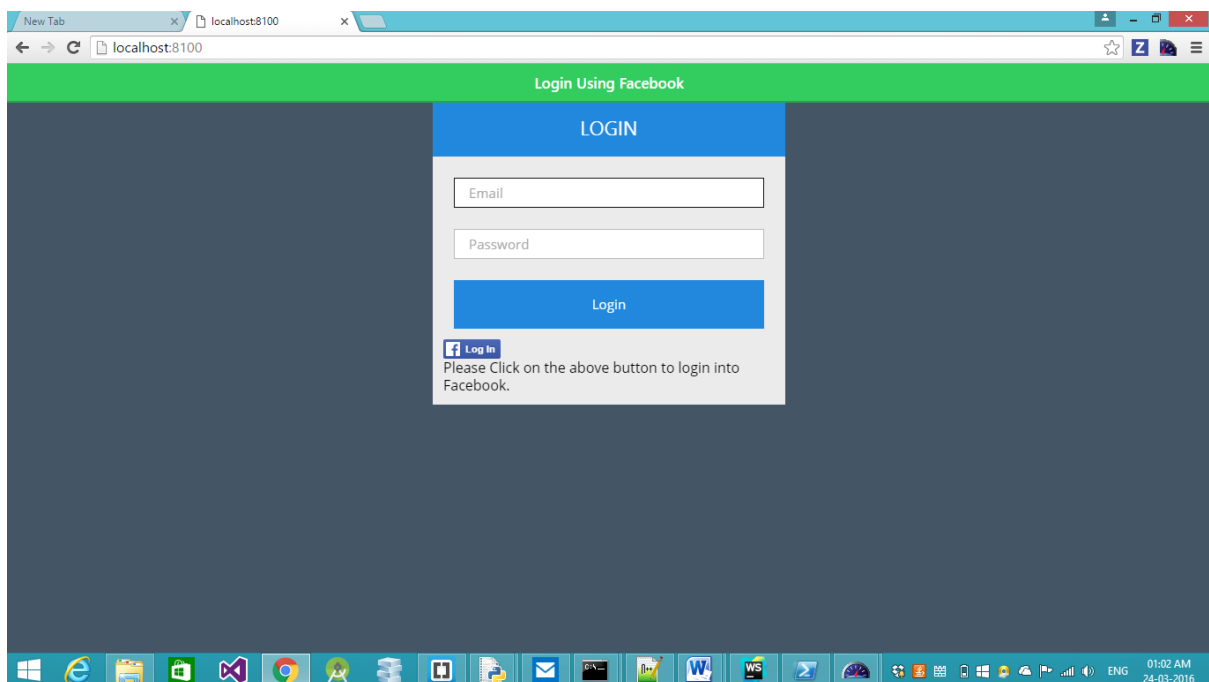

Created Login page along with the Facebook login Button. When we click on the Facebook button it will redirect to the Facebook Auth and asks for credentials to enter. Before that we need to create an account in Facebook developer page and we need to register our app in that in order to redirect to the Facebook Auth. After successfully login it will redirect to the home page(Rupee to Dollar) where the conversion takes place.

Grade A on Make fewer HTTP requests

This page has 4 external Javascript scripts. Try combining them into one.
This page has 3 external stylesheets. Try combining them into one.

Decreasing the number of components on a page reduces the number of HTTP requests required to render the page, resulting in faster page loads. Some ways to reduce the number of components include: combine files, combine multiple scripts into one script, combine multiple CSS files into one style sheet, and use CSS Sprites and image maps.
